## PINCUSHION A series of pincushions in 12 colors representing the months.

"PINCUSHION" received Encouragement Prize of the 16th HIROSHIMA GOOD DESIGN AWARD in Product category.

### Cherry wood base

As the material for the pincushion base, we have selected gentle-looking cherry wood from various kinds of wood. Giving importance to maintaining a texture and appearance unique to the natural material, we have designed the base to be comfortable to the touch and provide steadiness for your needlework.

### Cloth and padding

Placing the highest priority on having needles smoothly go into the pincushion, we have selected thick, high-quality cotton sheeting as cloth for the pincushion. With a very smooth and soft texture, the cloth helps you smoothly insert needles into the pincushion. We have also carefully selected the padding material to prevent your needles from rusting even during long-term use. All materials are produced in Japan.

### Cellulose-Head Pins

The Cellulose-Head Pins that are included in this package are TULIP NEEDLES. The founder of Tulip, Atushi Harada, used cellulose to create the pins head so that each child's name could be written on the head of every pin. It is with this in mind that each pin is treated preciously in home economics classes in primary schools. Even today, TULIP NEEDLES are used in the sewing sets of primary schools all across Japan.
